

## “Blue Logic products and services shall contribute to reduce pollution and damage to the environment”

We shall aim to:

- design and deliver products which reduces or eliminate, pollution and spill to the environment
- design and produce products and systems for effective and environmental friendly maintenance and life cycle consequences
- produce our products sustainably
- exercise active influence to reduce customer’s and partner’s environmental footprint
- minimise our waste production and optimise resource usage
- ensure no unplanned and unwanted spill or discharge that can damage the environment
- conduct all our services according to the highest possible industry standards
- build trust and confidence among our customers and employees
- have environmental commitment and awareness from management and employees
- prevent and protect the environment from pollution
- operate and maintain a management system in accordance with ISO 14001

Environmental care shall be a line responsibility and at the same time everyone shall be responsible for their own influence on the environment.
